

Introduction to the **TTU Climate Center** and the **National Climate Assessment**

Nick Smith

Assc. Prof., Department of Biological Sciences, TTU

Director, Climate Center, TTU

nick.smith@ttu.edu

**CLIMATE
CENTER**

U.S. Global Change Research Program

**National Climate
Assessment**

Outline

- TTU Climate Center
 - Who we are
 - What we do
- National Climate Assessment (NCA5)
 - What is the NCA
 - NCA5 Ch. 26: Southern Great Plains

**CLIMATE
CENTER**

U.S. Global Change Research Program
**National Climate
Assessment**

Outline

- TTU Climate Center

- Who we are

- What we do

- National Climate Assessment (NCA5)

- What is the NCA

- NCA5 Ch. 26: Southern Great Plains

**CLIMATE
CENTER**

TTU Climate Center: Who we are

- Member of USGS-funded Climate Adaptation Science Centers (CASCs)

Climate Adaptation Science Center (CASC) Regions

The CASCs collaborate across boundaries to address shared ecosystems, watersheds, and landscapes

CLIMATE CENTER

TTU Climate Center: Who we are

SOUTH CENTRAL

- ★ University of Oklahoma
- Chickasaw Nation
- Choctaw Nation of Oklahoma
- Louisiana State University
- Oklahoma State University
- Texas Tech University
- University of New Mexico

- Consortium institution of the South Central CASC (SC-CASC)

CLIMATE
CENTER

TTU Climate Center: Who we are

SC-CASC:

- **Provide decision makers** with the science, tools, and information they need to address the impacts of climate variability and change
- **Transform how climate science is conducted** and applied in the south-central US
- **Support big thinking**, including multi-institutional and stakeholder-driven approaches to assessing the impact of climate on natural and cultural resources

SOUTH CENTRAL

- ★ University of Oklahoma
- Chickasaw Nation
- Choctaw Nation of Oklahoma
- Louisiana State University
- Oklahoma State University
- Texas Tech University
- University of New Mexico

CLIMATE
CENTER

TTU Climate Center: Who we are

- >100 active members
 - Faculty, students and postdocs
- 12 TTU Colleges
- 36 TTU Departments
- Open to anyone interested in, passionate about, or doing climate-related work

**CLIMATE
CENTER**

Outline

- TTU Climate Center

- Who we are

- **What we do**

- National Climate Assessment (NCA5)

- What is the NCA

- NCA5 Ch. 26: Southern Great Plains

**CLIMATE
CENTER**

TTU Climate Center: What we do

- Serve as regional hub for climate change
- Work with community members and stakeholders
- All areas of research that intersect with climate
- Monthly research and outreach meetings
- Events
 - Informational events on and off campus
 - Science by the Glass

**CLIMATE
CENTER**

Outline

- TTU Climate Center
 - Who we are
 - What we do
 - Where we are going
- National Climate Assessment (NCA5)
 - **What is the NCA**
 - NCA5 Ch. 26: Southern Great Plains

U.S. Global Change Research Program
**National Climate
Assessment**

What is the NCA?

- US government report
 - Congressionally mandated and overseen by multiple agencies
 - Delivered to congress and the president
- Climate change impacts, risks, and responses for USA
- Provides scientific foundation for decision making
- Policy relevant, but policy neutral

What is NCA? Mandate

- Result of the Global Change Research Act of 1990
- Every 4 years a report that “analyzes the effects of global change on the natural environment, agriculture, energy production and use, land and water resources, transportation, human health and welfare, human social systems, and biological diversity; and analyzes current trends in global change, both human-induced and natural, and projects major trends for the subsequent 25 to 100 years”

What is NCA? Review process

- Reviewed by:
 - Federal government experts
 - External experts
 - General public
 - External reviewers from NASEM
- Review by each group multiple times throughout the process
- All reviews responded to

U.S. Global Change Research Program
**National Climate
Assessment**

What is NCA? Audience

- Audience: decision makers
 - national, state, local, and Tribal governments, city planners, public health officials, adaptation specialists, nurses, farmers, business owners, community organizers, researchers, water utilities, ecosystem managers, educators, students, the media, and concerned individuals

What is NCA? Structure

- Each chapter has list of key messages
 - Conclusions based on authors' expert judgment and synthesis of the assessed information sources
 - Often present findings in the context of risks to natural and/or human systems

What is NCA? Confidence and Likelihood

- Calibrated terms in key messages
 - **Confidence**: based on the type, amount, quality, strength, and consistency of evidence; the skill, range, and consistency of methods to detect, evaluate, attribute, and interpret climate trends; and the degree of agreement across scientific information sources
 - **Likelihood**: based on measures of certainty expressed probabilistically

What is NCA? Content

- Four categories of chapters
 - Overview chapter (Ch. 1)
 - Physical science chapters (Ch. 2-3)
 - National topics chapters (Ch. 4-20)
 - Regional chapters (Ch. 21-30)
 - Response chapters (Ch. 31-32)

U.S. Global Change Research Program
**National Climate
Assessment**

About this Report
Guide to this Report

OVERVIEW

PHYSICAL SCIENCE

- 2. Climate Trends
- 3. Earth Systems Processes

NATIONAL TOPICS

- 4. Water
- 5. Energy
- 6. Land
- 7. Forests
- 8. Ecosystems
- 9. Coasts
- 10. Oceans
- 11. Agriculture
- 12. Built Environment
- 13. Transportation

- 14. Air Quality
- 15. Human Health
- 16. Indigenous Peoples
- 17. International
- 18. Complex Systems
- 19. Economics
- 20. Social Systems and Justice

REGIONS

- 21. Northeast
- 22. Southeast
- 23. US Caribbean
- 24. Midwest
- 25. Northern Great Plains
- 26. Southern Great Plains
- 27. Northwest
- 28. Southwest
- 29. Alaska
- 30. Hawai'i and US-Affiliated Pacific Islands

RESPONSES

- 31. Adaptation
- 32. Mitigation

FOCUS ON

- F1. Compound Events
- F2. Western Wildfires
- F3. COVID-19 and Climate Change
- F4. Risks to Supply Chains
- F5. Blue Carbon

APPENDICES

- A1. Process
- A2. Information Quality
- A3. Scenarios and Datasets
- A4. Indicators
- A5. Glossary

- All Figures
- All Key Messages

What is NCA5? Content

- Four categories of chapters
 - Overview chapter (Ch. 1)
 - Physical science chapters (Ch. 2-3)
 - National topics chapters (Ch. 4-20)
 - **Regional chapters (Ch. 21-30)**
 - Response chapters (Ch. 31-32)

U.S. Global Change Research Program
**National Climate
Assessment**

Outline

- TTU Climate Center
 - Who we are
 - What we do
 - Where we are going
- National Climate Assessment (NCA5)
 - What is the NCA
 - **NCA5 Ch. 26: Southern Great Plains**

U.S. Global Change Research Program
**National Climate
Assessment**

FIFTH NATIONAL CLIMATE ASSESSMENT

26. Southern Great Plains

Introduction

Health-related Key Messages from NCA5 SGP chapter

- Climate change is putting us at risk from climate hazards that **degrade our health and well-being** (high confidence).
- Climate change is expected to **increase heat-related illness and death** (very likely, high confidence).
- Climate change will **compound existing burdens**, with the greatest impact on people with the fewest resources to prepare and adapt (very high confidence).
- The **institutions that serve our communities have been challenged** to respond and adapt (medium confidence).

Resilience Actions to Address the Impacts of More Frequent or Severe Droughts on Communities

Resilience Actions to Address the Impacts of Heavier Rainfall Events on Businesses

Resilience Actions to Address the Impacts of Hotter Summer Temperatures on Outdoor Activities

Resilience Actions to Address Equity and Justice Issues Related to Increasing Hurricane Risk

Resilience Actions to Address the Impacts of Severe Winter Storms on Public Services

STARTLEMENT

by Ada Limón, 24th Poet Laureate Consultant in Poetry at the Library of Congress

It is a forgotten pleasure, the pleasure
of the unexpected blue-bellied lizard

skittering off his sun spot rock, the flicker
of an unknown bird by the bus stop.

To think, perhaps, we are not distinguishable
and therefore no loneliness can exist here.

Species to species in the same blue air, smoke—
wing flutter buzzing, a car horn coming.

So many unknown languages, to think we have
only honored this strange human tongue.

If you sit by the riverside, you see a culmination
of all things upstream. We know now,

we were never at the circle's center, instead
all around us something is living or trying to live.

The world says, What we are becoming, we are
becoming together.

The world says, One type of dream has ended
and another has just begun.

The world says, Once we were separate,
and now we must move in unison.

Ada Limón, 24th US Poet Laureate
